

CS410 Weekly Report

Team Copper AI²

Performance Period: Sunday 2/1 - Saturday 2/7

Summary of Group Accomplishments:

- This week the following tasks were completed:
 - The team had an additional meeting time this week (2/5 @ 11am ET) to finalize the skeleton for the project repository.
 - During the Friday meeting (2/6) the team divided into pairs to work together on. Michael and Craig will start work on the database. Dusan and Tommy will start work on the matching logic. Quin and Savannah will work on the UI on the frontend. Lynda and Julian are going to work on the data extraction and reading.

Individual Contributions/Accomplishments: (to be filled out by each individual)

Craig:

- Craig created a basic Python virtual environment with scripts and a basic frontend skeleton with Flask. Craig is hopeful this will be a helpful starting point for our project.

Dusan:

- Dusan recorded a tutorial for the Flask/SQLAlchemy setup and installation for the team to make sure that everyone is on the same page starting out.

Lynda:

- Lynda is working on adding some updates to the team website in anticipation of Initial Website Update assignment (1/7).

Savannah:

- Savannah has taken the torch from Dusan on writing the general portion of the weekly progress reports, and has retroactively written them for the prior weeks of this semester. Savannah will add these to the team website for the initial website update.

Key Objectives for Coming Week (top level prototype development objectives)

- Each pair should have progress put toward their given section prior to the next Friday meeting.
- Each team member should continue to stay on top of updating their learning log.

Issues/Concerns:

- None
